Tonga's experience

- We got good hands-on in deploying Magma using OSM.
- Many of us are stepping into OSM and we got a good insights.
- Since some of us are very new to telecom, overview about 4G networks were informative.
- We have got timely support for the issues we faced during on-boarding.
- The Co-ordinators supported well during our deployment task.
- Initially, We faced challenges in the adding in k8-cluster because of kube_config file issue.
