OSM Hackfest – Guidelines for VNF builders

Eduardo Sousa (Canonical)
Guillermo Calviño (Altran)

Build your VNF diagram

Build your NS diagram

Fill in a table with the VDUs

VNF name	VDU name	Image name	Flavor			Nº ifaces	GUEST EPA INFO			
			vCPU	vMem	vDisk		Mempage size	Dedicated CPUs (YES/NO)	Cores or HW threads	Strict NUMA Mem Policy (YES/NO)

This table is a reference table. Other parameters could be added, such as the existence of a cloud-init file for each VDU, if the VDU has a charm, etc.

Fill in a table with the images

Image name in the VNF descriptor	Filename

Fill in a table with the interfaces

VNF name	VDU name	Iface name	Type (VIRTIO, SR-IOV, PCI passthrough, ...)
