OSM Release ELEVEN preview

SOL004 and SOL007 package formats

Brand-new support for Google Cloud

Google Cloud

Fine-grained operations in CNFs

- Start and stop services
- Run one-shot commands
- Files API

Better coordination across PNFs, VNFs, and CNFs

 Enhanced data exchange between NFs in the NS.

Soon available at: osm.etsi.org

CNF monitoring from Kubernetes metrics

 Metrics collection from K8s clusters in centralized Grafana dashboard.

Enhanced installation process

 Support of Ubuntu 20.04 and better tracking of the installation process.

... and other improvements in usability and stability derived from the learnings of latest OSM production deployments

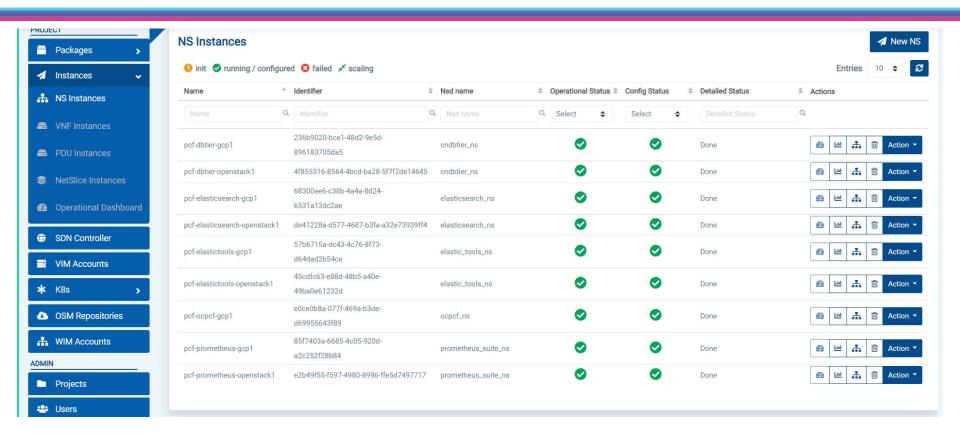

SOL004 & SOL007

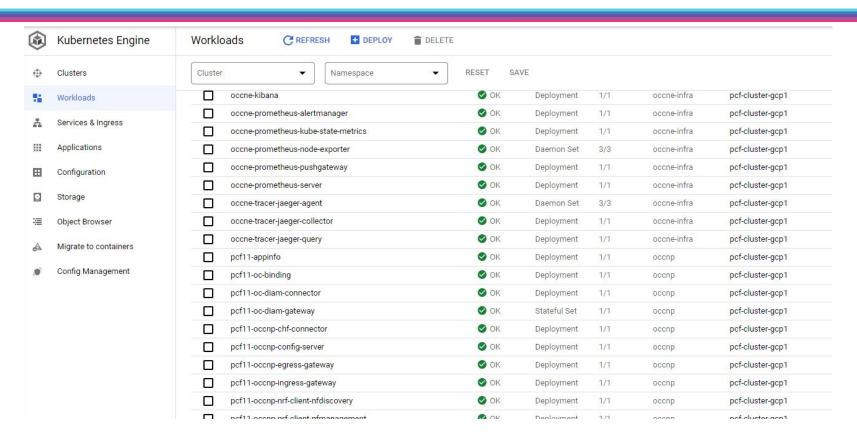

VIM plugin for Google Cloud

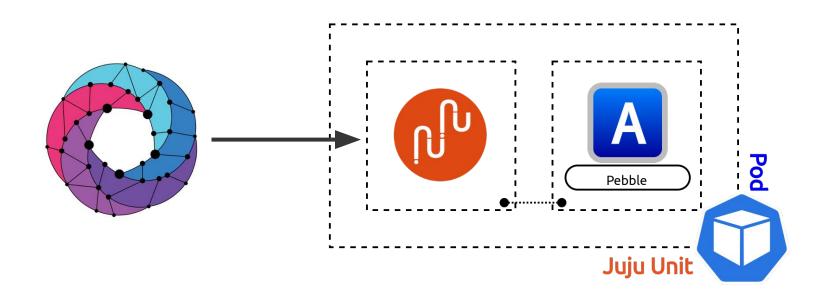

Bonus: Google Cloud as K8s Cluster

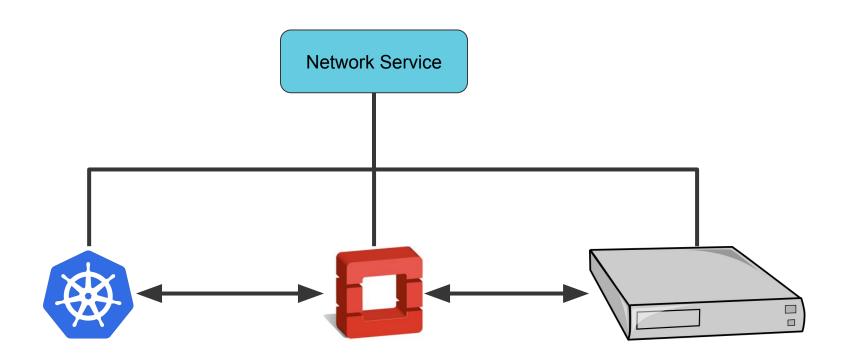

Fine-grained operations in CNFs

Integration across PNF, VNF, and CNFs

CNF Monitoring of Kubernetes

Thank you
